PUBLIC SPEAKING & VOCAL DEVELOPMENT EXPERT

Executive Communication Training

Speaking Presence for Professionals

ABOUT PERRY

Perry works with executives, professionals, and public figures who want their voice and presence to match the level of their ideas. Drawing on vocal technique, breathwork, and communication psychology, Perry helps clients speak with clarity, authority, and genuine ease — on stage, in the boardroom, or on camera. The approach blends the technical precision of vocal coaching with the practical demands of executive communication: structuring a message, owning a room, and staying composed under pressure.

AREAS OF EXPERTISE

- **Public Speaking Coaching** — confident, structured, engaging delivery for keynotes and high-stakes presentations.
- **Vocal Development** — voice projection, breath control, tone, and articulation for lasting vocal presence.
- **Executive Communication** — tailored coaching for leaders speaking with authority in meetings, media, and negotiations.
- **Speaking Presence** — body language and stage energy so delivery feels natural, not performed.

WHO IT'S FOR

Executives, entrepreneurs, consultants, and professionals preparing for a keynote, a pitch, a media appearance — or simply seeking a more confident, everyday communication style.
